## Fully Managed Network Services Restoring Convenience to EG Group

### Evolve's SD-WAN Enables EG Group to streamline Global Network Management

EG Group is a leading independent fuel station and convenience retailer with operations in over 6,000 sites across 10 countries. As a global organisation, EG Group requires a robust and reliable network infrastructure to support its business operations. To achieve this, EG Group relies on Evolve, a UK-based managed service provider, as one of their key global suppliers.

### The Solution

Evolve's partnerships with over 60 ISPs worldwide enable EG Group to simplify their network management by placing communication orders with one company, without the need to deal with individual in-country ISPs for troubleshooting or billing. Evolve's SD-WAN delivers a single view of EG Group's global network, enabling easy management and deployment of network service integration for payments and loyalty across all their business sectors, such as fuel, food-to-go, and more.

Evolve's SD-WAN solution has enabled EG Group to achieve several benefits, including:

### The Results

Streamlined network management, reducing complexity and improving efficiency.

Single point of contact for communication orders, troubleshooting, and billing.

A single view of their global network, enabling EG Group to simplify management and troubleshooting.

Reliable and robust network infrastructure, supporting their business operations across multiple countries.

### The Conclusion

Evolve's SD-WAN solution has enabled EG Group to streamline its global network management and achieve its business objectives. With a reliable and robust network infrastructure in place, EG Group is well-positioned to continue its growth and expansion in the highly competitive fuel and convenience retail market. Evolve's partnerships with over 60 ISPs worldwide and their SD-WAN solution demonstrate their commitment to delivering exceptional customer service and support to their customers.
